SUMMARY

I am a full-stack developer and robotic engineer with 7+ years of work experience in software development, testing and quality assurance. Solid understanding of software development life cycle (SDLC), software testing life cycle (STLC) and bug cycle. Sound programming knowledge of PHP, SQL, NodeJS (Express, Nest, Socket.io), JavaScript (ES6, Typescript), HTML, CSS, Bootstrap, JavaScript Frameworks & Libraries (Angular, React, Vue) and hands-on experience in Python, Kotlin, C#, & C++. Worked extensively on research, design, programming and building robotic systems that performs variety of tasks in manufacturing, fintech, agriculture and healthcare industries.

SKILLS

- PHP • SQL (MySQL, MSSQL, NoSQL, SQLite) • MongoDB • C# • JAVA
- Python • Kotlin • NodeJS • JavaScript • Robotic Process Automation (C++)

- Frameworks (Laravel, Angular, Spring, React, Express, ASP.Net)

STRENGTH: Critical Thinker, Creative, Flexible and Problem-solving abilities.

PROFESSIONAL EXPERIENCE

NowNow Digital Systems Ltd., Lagos, Nigeria — Mar. 2023 – Present

Fullstack Developer (PHP / Angular)

- Developed and manages existing solutions that enables state government of several states in Nigeria to accurately manage tax collections on businesses, lands, amongst others, manage IGR and proffer solutions to citizens vehicle registration and licenses management on the fly.
  Technologies: LAMP (Laravel Framework), Angular, Git

Winexviv International, Lagos, Nigeria — July 2019 – Feb. 2023

Back-end Developer (educare)

- Developed the error notifier module that intercepts errors from the end-users, log the error and immediately notifies the support team with detailed report before the end-user complains thereby increasing customer satisfaction and productivity by 35%.
  Technologies: LAMP (Laravel Framework), AngularJS, Git

- Collaborated in building a well-thought-out accounts and finance module integrating wallet and modern payment APIs (RAVE, Paystack) which ensures smooth transactions and intuitive dashboard detailing all transactions and their corresponding graphical data.
  Technologies: LAMP (Laravel Framework), AngularJS, Git

- Teamed up to build a robust HRM (Human Relations Management) module that caters for employment process, personnel information management, staffing, discipline, leave management and payroll.
  Technologies: LAMP (Laravel Framework), AngularJS, Git

Robotic Engineer (educare)

- Teamed up to build Automated Hand-washing Machine and Disinfectant Boot to mitigate the spread of corona during the 2020 corona pandemic.
  Technologies: C++ (Programming), ArduinoUno, PIR Motion Sensor, Ultrasonic Sensor, e.t.c

- Teamed up to build Fruit Sorting based on color and size for agricultural produce packaging system.
  Technologies: C++ (Programming), Raspberry Pi, AT Mega2560, Pi Camera, Ultrasonic Sensor, Servo Motors

- Trains students (beginners and intermediate level) in **STREAM** (Science Technology Reading Engineering Arts & Mathematics) programs & Robotic engineering

Software Engineer & Support (SFS Capital Nigeria Limited)

- Design, develop and modify software systems, using scientific analysis and mathematical models to predict and measure outcome and consequences of design.
  Technologies: LAMP (Laravel Framework), React, NextJS, MEAN -stack, Git

- Analyze user needs and software requirements to determine feasibility of design within time and constraints.
  Technologies: Microsoft Excel, SPSS

DONROSE-RK Nigeria Limited, Delta, Nigeria December 2016 – August 2018

Full Stack Developer & Administrator

- Developed a stock management and accounting web-app that track transactions between the company and Nigerian Breweries.
  Technologies: LAMP (Laravel Framework), AngularJS, Git

- The web-app facilitated the discovery, recovery and reconciliation of 7-million-naira worth of pending delivery goods in its first 6 months of deployment.

- Managed and balanced Reps, LARs, VSMs and Bulk-buyers accounts effectively.
  Technologies: phpMyAdmin, Excel, VBA script (Visual Basic for Applications)

- Engineered a software that monitors diesel usage (VSMs and Company's electricity generating plant and cost of depreciation of company's vehicles, the individual sales of each staff and the profit margin per head.
  Technologies: Python, MongoDB, Excel, VBA script (Visual Basic for Applications)

- Facilitated continuous interactions between users, development and QA teams throughout the SDLC resulting in a 96% testing success rate
  Technology: Git, Docker, Slack, TeamViewer

National Youth Service Corps, Bayelsa, Nigeria March 2014 – February 2015

IT Support (Accounts & Finance)

- Built an Excel VBA Snippet that seamlessly handled the internal processing of corp members federal monthly allowance disbursement thereby reducing workload on other NYSC accounts staff by 45%.
  Technology: Excel, VBA Script (Visual Basic** for **Applications), Git

- Structured and appropriately kept records.
  Technologies: phpMyAdmin, Excel, Visual Basic** for **Applications

- Managed document control within the secretariat by building a minimalist document control system networking the five departments to share resource and conveyed data effectively.
  Technologies: Microsoft Visual Basic, Microsoft Access, Batch Script

---

EDUCATION

Rufus Giwa Polytechnic, Owo, Ondo State, Nigeria. September 2013

Bachelor of Technology — Computer Engineering Technology

- Relevant Coursework: Digital Electronics, Algorithm, Matlab, C++
