## SUMMARY

Versatile Full-Stack Engineer and Systems Automator with over 9 years of experience designing, building, and deploying production-grade applications. Strong expertise in backend architectures, microservices synchronization, and reliable infrastructure pipelines. Deeply hands-on with Google Cloud Platform (GCP) for hosting, containerization, and serverless workflows, with solid cross-cloud exposure to AWS and Azure ecosystem tools. Proven track record across fintech, government revenue systems, and logistics automation, blending clean application development with stable DevOps fundamentals.

## TECHNICAL SKILLS

- **Programming Languages:** PHP (Modern 8.x), JavaScript/TypeScript (ES6+), C# (.NET Core), Python, C++ (Embedded/IoT), Kotlin
- **Backend Frameworks & Architecture:** Laravel (Eloquent, Queues), NestJS, ASP.NET Core (Web API, Entity Framework Core), Express.js, Node.js, Spring Boot, RESTful/GraphQL API Design, Microservices Architecture, Event-Driven Systems (SignalR)
- **Frontend Technologies:** Angular, React, Next.js, Blazor, HTML5/CSS3
- **Databases & Storage Infrastructure:**
  - *Relational (RDBMS):* PostgreSQL, MySQL, Microsoft SQL Server (MSSQL), SQLite
  - *NoSQL & Document:* MongoDB, Redis (Distributed Caching & Session Management)
  - *Data Operations:* Query Optimization & Indexing, Database Migration Scripts, ORM/ODM Configuration, Data Synchronization
- **Cloud & DevOps (Primary: GCP):** Google Kubernetes Engine (GKE), Artifact Registry, Cloud Run, Cloud Functions, AWS (EC2, S3, EKS), Azure (App Services, Azure Functions, Azure Pipelines)
- **CI/CD & Infrastructure as Code:** GitHub Actions, CircleCI, Docker, Docker Compose, Terraform (GCP/AWS providers)
- **Automation & Robotics:** Embedded C++, Arduino, Raspberry Pi, Robotic Process Automation

## PROFESSIONAL EXPERIENCE

**Gofly Travel & Tours Limited**, Lagos, Nigeria — Jan 2026 – Present
***Full Stack Developer (PHP / Angular)*** | *Full-time*

- Build and maintain features on makeifly.com, the company's flight and hotel booking platform. Integrated a hotel booking supplier and a new payment gateway.
- Moved the build pipeline to GCP Cloud Build and packaged the application with Docker for staging.
- Deployed the app on Cloud Run so it scales up on its own during busy booking periods.

***Stack:*** *Laravel, Angular, MySQL, Docker, GCP Cloud Build, Cloud Run*

**Blouza Technologies Ltd.**, Lagos, Nigeria — Jul 2025 – Present
***Full Stack Developer (PHP / NestJS / React)*** | *Full-time, Remote*

- Lead development of CareSol, EasyPay and ReMS, and contribute to the rest of the product line, much of it revenue and tax software for state and local governments.
- Build REST APIs in NestJS and Laravel. Reworked the data aggregation queries that were slowing responses down, which brought average API latency down noticeably.
- Set up GCP environments with Terraform so development and production are configured the same way.
- Wrote GitHub Actions pipelines that lint, run the test suite, and push an image to Artifact Registry only when everything passes.
- Maintain a set of shared React components used across the company's frontends.

***Stack:*** *NestJS, Laravel, React, Next.js, PostgreSQL, Terraform, GitHub Actions, Artifact Registry*

**PayOnDelivery**, Houston, Texas (Remote) — Jan 2025 – Dec 2025
***Lead Developer (PHP / React)*** | *Part-time consultancy*

- Owned the engineering roadmap for a cross-border marketplace and shipped its buyer-to-seller checkout and payment flows.
- Reviewed pull requests, ran deployments and looked after the servers. Kept uptime at 99.9% with automated alerts and recovery.

- Migrated the app off its old hosting onto AWS EC2, with S3 for file storage and CircleCI for deploys.
  ***Stack:*** *Laravel, React, MySQL, AWS EC2, S3, CircleCI*

**NowNow Digital Systems Ltd.**, Lagos, Nigeria — Mar 2023 – Jan 2026
***Full Stack Developer (PHP / Angular)*** | *Full-time*

- Worked on government revenue platforms in several states, covering tax collection, business licensing, land revenue and vehicle registration.
- Built internal services in ASP.NET Core Web API for authentication, role permissions and two-way data sync with the older PHP systems still in use.
- Helped containerise the state-level services and move them to GKE, giving each state its own isolated deployment and better fault tolerance.
- Rewrote slow SQL queries and added Redis caching, cutting API response times by 32%.
- Built reusable Angular components that made the admin screens faster and easier to maintain.
  ***Stack:*** *Laravel, Angular, ASP.NET Core (C#), SQL Server, MySQL, Redis, GKE*

**Winexviv International**, Lagos, Nigeria — Jul 2019 – Feb 2023
***Backend Developer & Robotics Engineer (educare)*** | *Full-time*

- Built an error notifier for the educare platform that flags critical failures as they happen. Issue resolution improved by 35% after it went live.
- Helped design the accounts and finance module, including multi-currency wallets and a fallback between Paystack and Rave when one gateway failed.
- Worked on an HRM system covering staffing, payroll, leave and employee records.
- Set up Azure Pipelines for some business units so builds were verified before going out to Azure App Service.
- On the hardware side, built automated hand-washing machines and disinfectant booths during the 2020 pandemic and a fruit-sorting system on Raspberry Pi. Also taught STREAM robotics classes to students.
  ***Stack:*** *Laravel, AngularJS, MySQL, Azure Pipelines, Azure App Service, C++, Arduino, Raspberry Pi*

**SFS Capital Nigeria Limited**, Lagos, Nigeria
***Software Engineer & Support***

- Built internal data-processing tools and portals in React, Next.js and Laravel on top of existing .NET APIs.
- Did feasibility analysis on large proposed features, using mathematical modelling to test designs before development started.
  ***Stack:*** *Laravel, React, Next.js, .NET APIs*

**Freelance**, Oyo State, Nigeria — Sep 2018 – Jun 2019
***Software Developer*** | *Self-employed*

- Built and maintained web applications for small businesses in Laravel and MySQL, handling everything from requirements through to hosting and support.

**DONROSE-RK Nigeria Limited**, Delta, Nigeria — Dec 2016 – Aug 2018
***Full Stack Developer & Administrator*** | *Full-time*

- Built a stock management and accounting web app that tracked goods moving through the company's distribution network. It helped recover ₦7 million in unaccounted deliveries within six months.
- Added tools for diesel usage, vehicle depreciation, sales staff performance and profit analysis.
  ***Stack:*** *PHP, MySQL, Excel VBA*

**Freelance**, Delta, Nigeria — Mar 2015 – Nov 2016
***Web Developer*** | *Self-employed*

- Built websites and small database-backed web tools in PHP and MySQL for local businesses, and kept them running after launch.

**National Youth Service Corps**, Bayelsa, Nigeria — Mar 2014 – Feb 2015
***IT Support (Accounts & Finance)***

- Automated the monthly allowance processing for corps members in Excel VBA, which cut the workload by 45%.
- Ran document control across departments using Microsoft Access and Visual Basic.

## EDUCATION

**Rufus Giwa Polytechnic**, Owo, Ondo State — Sep 2013
*Bachelor of Technology, Computer Engineering Technology*
Coursework: digital electronics, algorithms, MATLAB, C++
